PROFESSIONAL SUMMARY

Senior Analyst, Digital Products and Certified Scrum Product Owner with extensive experience bridging business operations, enterprise technology, product ownership, and software delivery. Lead the functional evolution of business-critical applications by translating operational needs into requirements, backlog priorities, technical direction, testing strategies, release plans, and production support.

Experienced in Azure DevOps delivery governance, business analysis, SQL and enterprise data investigation, system and process mapping, UAT and QA coordination, systems integration, stakeholder communication, user enablement, and release management. Full-stack development training provides additional technical depth across React, JavaScript, Node.js, APIs, databases, testing, and application architecture.

CORE STRENGTHS

- | | |
|--|--|
| • Product Ownership & Product Governance | • Azure DevOps Backlog & Delivery Management |
| • Business Analysis & Requirements Definition | • Enterprise Application Ownership |
| • SQL, Data Analysis & Reconciliation | • Enterprise System & Process Mapping |
| • UAT, QA & Test Coordination | • Release & Change Management |
| • Systems Integration | • Production Support & Root-Cause Analysis |
| • Stakeholder & Cross-Functional Leadership | • User Adoption, Training & Documentation |
| • Process Improvement & Digital Transformation | • Full-Stack Software Development |

PROFESSIONAL EXPERIENCE

Senior Analyst, Digital Products

BrandSafway, LLC
Feb 2026 - Present

- Serve as functional product owner for a business-critical enterprise platform supporting operational, billing, inventory, financial, and business processes across multiple locations.
- Translate business needs, production issues, audit requirements, and enhancement requests into refined requirements, acceptance criteria, priorities, test plans, and implementation direction.
- Own the Azure DevOps delivery process for the product, maintaining backlog structure, workflow visibility, prioritization, refinement, development coordination, QA, UAT, change governance, release readiness, and post-release validation.
- Partner directly with developers and technical teams to analyze application behavior, clarify functional logic, evaluate solution options, and guide enhancements from discovery through production.
- Perform extensive SQL investigation and enterprise data analysis to trace transactions, reconcile discrepancies, identify business rules, map application relationships, support root-cause analysis, and validate production results.
- Map complex legacy application processes and interconnected systems to improve understanding of data flows, integrations, operational dependencies, and technical requirements.
- Coordinate QA and user acceptance testing, including test scenarios, business testers, evidence requirements, defect triage, release readiness, and stakeholder communication.
- Established a formal product User Council to create a structured channel for business feedback, UAT participation, product communication, enhancement discussion, and user involvement in product evolution.
- Lead release and change-management activities across development, business, operations, finance, and other stakeholders, including readiness reviews, deployment communications, validation, and follow-up.
- Support enterprise integrations and modernization initiatives involving operational systems, tax services, financial platforms, master data, reporting, and related business workflows.
- Design and maintain centralized digital workspaces, documentation libraries, release communications, training resources, user guides, and self-service support experiences to improve adoption and product transparency.

PROFESSIONAL EXPERIENCE - CONTINUED

Operations Controller

BrandSafway, LLC - Boutte, LA
Mar 2021 - Feb 2026

- Directed financial and operational control for a multimillion-dollar business operation, including budgeting, forecasting, cost reporting, financial analysis, and performance management.
- Performed monthly and quarterly balance-sheet reviews, variance analysis, account reconciliation, and operational financial reporting.
- Partnered with branch, regional, project, and operational leadership to identify performance gaps, investigate financial drivers, and implement corrective actions.
- Led job-cost and margin reviews with project managers, estimators, and operations teams to strengthen cost control and financial visibility.
- Owned month-end accounting activities including journals, accruals, capital expenditure tracking, intercompany accounting, and financial close support.
- Developed reporting tools, KPI analysis, and management information used for operational reviews and executive decision support.
- Supported and evaluated enterprise systems used for timekeeping, job tracking, billing, purchasing, and operational processes, building the functional and technical experience that led to transition into Digital Products.

Division Resource Manager / Office Manager

BrandSafway, LLC - Boutte, LA
Aug 2018 - Mar 2021

- Directed divisional billing, procurement, office operations, inventory management, and resource allocation.
- Built reporting tools that improved visibility into project, inventory, and operational performance.
- Administered inventory controls for approximately \$30M-\$100M in physical assets.
- Supervised a multifunctional team and standardized processes across operational and administrative departments.
- Negotiated supplier agreements and supported purchasing and cost-control initiatives.

Division Resource Manager

Brand Energy & Infrastructure Services - LaPlace, LA
2015 - 2018

- Directed inventory, logistics, equipment movement, and resource coordination across multiple operating locations.
- Managed more than \$50M in physical assets and maintained inventory accountability across complex operational environments.
- Led a team of approximately 10-20 employees, improving planning, workflow efficiency, and on-time delivery.
- Evaluated vendor relationships, purchasing arrangements, and cost-reduction opportunities.

Environmental Health & Safety Specialist

Brand - Various Sites
2011 - 2015

- Coordinated regulatory compliance, safety programs, field audits, and operational risk-management activities.
- Produced root-cause investigation reports and supported corrective-action and risk-mitigation efforts.
- Monitored performance metrics and recommended process and site-level improvements.

Field Supervisor

Sci-Net, LLC - Baton Rouge, LA
Jun 2007 - Jul 2010

- Managed field operations, inventory allocation, reporting, workforce performance, and customer support.
- Conducted employee performance reviews and maintained service quality and customer satisfaction.
- Supported database and server infrastructure performance and availability.

Systems Support Specialist II

Cox Communications - Baton Rouge, LA
Jun 2001 - Jul 2007

- Helped build support operations for emerging broadband, high-speed internet, and voice-over-IP services.
- Developed escalation and resolution procedures and provided technical troubleshooting, ticket analysis, and user training.
- Contributed end-user and support expertise to system and application development initiatives.

TECHNOLOGY & PRODUCT TOOLS

- Azure DevOps
 - SharePoint
 - Git / GitHub
 - React
 - Node.js / Express
 - MongoDB
 - HTML / CSS
 - SQL Server / SSMS
 - Power Apps
 - Visual Studio
 - JavaScript
 - REST APIs
 - Relational Databases
 - Responsive Web Development
-

EDUCATION & CERTIFICATIONS

- **Certified Scrum Product Owner (CSPO)** - Scrum Alliance
 - **Full-Stack Immersion** - CareerFoundry, completed Sep 2025
 - **Intro to Frontend Development** - CareerFoundry
 - **Associate of Science, Computer Information Systems** - ITI Technical College, Baton Rouge, LA
 - **Associate of Science, Computer Information Systems** - Remington College, Baton Rouge, LA
- Additional training and credentials include CSST, CSS, NCCER Safety, OSHA-10, OSHA-30, and First Aid/CPR.
-

SOFTWARE DEVELOPMENT BACKGROUND

Completed intensive full-stack development training covering advanced JavaScript, modern frontend frameworks, Node.js and server-side programming, relational and non-relational databases, data visualization, application security, test-driven development, documentation, and collaborative software delivery.

Built hands-on applications using React, Angular, React Native, Node.js, Express, MongoDB, Firebase, serverless services, REST APIs, authentication, responsive interfaces, and progressive web application patterns. Development work is available through the portfolio and GitHub links above.
